

DONOR SECURITY

United Mission for African Children (UMAC) is committed to protecting the financial information of donors.

This includes safe protocols for collecting donations and maintaining internal controls that ensure the safety of all confidential donor financial and personal information.

UMAC will not share any donor information with other entities or individuals. In the event of donations processed by third-party service providers, donor information will be utilized solely for the purposes of payment processing.

Ensuring a donor's privacy is critical to the ongoing relationship with our donors. Protecting the financial information systems and donor financial transactions is central to our efforts to maintain trusted, long lasting relationships with our donors.

How Information Is Disclosed:

- Credit card data is utilized solely for the purposes of processing donations for the organization. In the event of third party payment processing, credit card data will be utilized for processing only.
- UMAC and its associated third party processing payment systems use secure technology to accept online credit card donations through (SSL) online technology or industry standard security measures and encryption technology.
- While UMAC provides security protocols and secure technology to process credit card information, we cannot absolutely guarantee that the credit card data will be secure or be liable for information that donors share with others.
